

Harris School Solutions has an issue tracking system, named JIRA, to monitor program enhancements and defects. The WEB numbers refer to the issues in JIRA that were resolved in this release.

To submit an idea for product enhancements/improvements, click [here](#).

Improvements

Admin

- Admin > Data Management > Student I/O > Student Imports: Updated the performance level substitution definitions for the STAAR Grades 3-8 and STAAR - EOC imports. WEB-4113

Finance

- GL > Ledger Manager > Change Ledger Status > Promote Encumbrance: Encumbrance promotion no longer fails when there are no balances attached to missing codes. When there is no balance, POs are marked as fulfilled. Missing codes only cause promotion to fail if balances are attached to the codes being retired. WEB-3863
- Payroll > Processing > Payroll Checks: Added the state income tax deduction to the pay stub. WEB-3212
- Reports
 - Accounts Payable > Fixed Asset Ledger Reconciliation report: When the purpose is Accumulated Depreciation, the report now correctly respects the Fiscal year parameter. WEB-3999
 - Human Resources > Employee Directory Report: A new parameter allows user to include employees' emergency contact information. WEB-4190
 - Payroll > Benefit Program Participation: When Report Grouping is By Plan, deleted benefit programs are included at the bottom of the Benefit Program drop-down list. WEB-4155

Students > Reports

- ETS Student Extracts: Added the codes for IB biology and US history. WEB-4196
- Student Demographic Extract: Corrected the race coding for this extract. WEB-4124
